PROFILE

Backend Engineer and Information Technology graduate with strong foundation in building scalable systems across enterprise, startup, and research environments. Proven leadership track record leading student organizations and community programs, including securing a 25% budget increase through stakeholder negotiation. Passionate about driving innovation through technology, operational efficiency, and solving complex problems with measurable impact, from streamlining enterprise operations to building secure, data-driven solutions for financial services and regulated industries. Seeking to contribute technical expertise and leadership potential in a dynamic environment where forward-thinking digital solutions make a real difference.

EDUCATION

Universitas Gadjah Mada Sleman, Yogyakarta
Bachelor of Engineering in Information Engineering Aug 2021 - April 2026
GPA: 3.40/4.00 | **Thesis:** "Performance Comparison of Proof of Authority and Proof of Stake Consensus Mechanisms on DChain National Blockchain Network" (Grade A) | **Relevant Coursework:** Software Engineering, Software Architecture, Digital Transformation, Application and Information Integration, Data Structure and Algorithm. | **Teaching Assistant:** IT courses (Aug 2023 – Dec 2025) — mentored students, managed LMS operations, and built Python automation tools.

LEADERSHIP

Head of UKM Bridge UGM Sleman, Yogyakarta
UKM Bridge UGM Jan 2023 - Dec 2023

- Led 5 internal divisions and secured a 25% budget increase through stakeholder negotiation and alumni engagement.
- Expanded recruitment and program improvements, resulting in significant member growth.
- Organized national-level bridge competitions and promotional events, fostering team discipline and strategic thinking.

Group Coordinator (Kormanit) Sleman, Yogyakarta
KKN-PPM UGM Jul 2024 - Aug 2024

- Led a 30-member multidisciplinary team across 4 villages, coordinating execution under tight timelines.
- Resolved cross-team operational issues and ensured community program delivery, achieving an A grade for the team.
- Handled administrative, financial, and stakeholder coordination, ensuring seamless operations.

Vice Head of Electropreneur Division Sleman, Yogyakarta
KMTETI FT UGM Feb 2023 - Dec 2023

- Led business workshops and networking programs, facilitating partnerships with alumni and professionals.
- Supported entrepreneurship events for engineering students, fostering innovation and business mindset.

EXPERIENCE

Co-Founder & Backend Engineer (Project-base) Hybrid
Sumbu Labs (PT Sumbu Inovasi Digital) Feb 2025 - Present

1st Project — CAR-dano — Blockchain-backed Vehicle Inspection Platform (Completed: Feb–Oct 2025)

- Reduced vehicle-inspection turnaround by up to 50% through backend workflow optimization, database performance improvements, and automation.
- Reduced API response time by 60% and achieved 100% uptime while supporting 20 concurrent users.

2nd Project — SumbuPay — Web3 Payment Infrastructure (Ongoing)

- Built backend foundations for Web3 payment infrastructure, integrating QRIS and MPC wallet workflows.
- Collaborated cross-functionally to ensure product readiness, securing IDR 50M in startup support funding.
- Implemented secure coding practices and data encryption measures to ensure compliance and data integrity across payment workflows.

Backend Engineer (Project-based) Remote
PT Pertamina EP WOPDM Z4 (via LKFT UGM) Oct 2025 - Present

- Stabilized and extended backend systems using Python/FastAPI, SQL Server, and caching for data-driven insight generation.
- Resolved 75%+ of critical technical debt, improving system reliability and deployment speed.
- Integrated backend with LLM tool calling, supporting 5 use cases for Pertamina EP Zona 4.
- Implemented robust authentication and database optimization with secure coding standards, ensuring scalability, observability, and data integrity.

Blockchain Developer Intern Jakarta Selatan
Kemdiktisaintek Sep 2024 - Dec 2024

- Built a blockchain-based accreditation certificate management system using Next.js, TypeScript, and ethers.js, with Excel bulk upload and NFT minting integration.
- Collaborated with a team of 6 interns and mentors, actively participating in blockchain events and hackathons in Jakarta.

Blockchain Researcher Intern

Hybrid

Universitas Gadjah Mada — Pharmachain Project

Oct 2023 - Jan 2024

- Built a Hyperledger Fabric pharma-supply-chain prototype with 2 independent networks, 6 organizations, and 30+ Docker containers.
- Implemented cross-chain identity sharing, encrypted IPFS storage, and off-chain database integration for traceable and tamper-proof data exchange.

Backend Developer (Project-base)

Remote

Universitas Gadjah Mada — Technocorner Competition

Nov 2022 - May 2023

- Built the entire backend REST API from scratch for a national competition platform supporting 5 tracks.
- Implemented authentication, role-based access, Google Drive/Sheets integration, and frontend-backend integration.
- Resolved deployment issues and ensured platform stability during high-traffic events.

SKILLS

- **Backend:** Go (Active Learner), Python (FastAPI), NestJS, Express.js, REST API Design, OpenAPI/Scalar
- **Infrastructure & DevOps:** Docker, Kubernetes, GitHub Actions, Linux, Git
- **Databases:** SQL Server, PostgreSQL, MongoDB, Redis
- **Blockchain & AI:** LLM Integration/Tool Calling, Ethers.js, Hyperledger Fabric (used-before), IPFS, Next.js
- **Languages:** Indonesian (Native), English (Professional Working Proficiency)
- **Soft Skills:** Leadership & Team Coordination, Problem-Solving & Adaptability, Cross-Functional Collaboration, Operational Efficiency & Automation

ACHIEVEMENTS

- 1st Winner — National Vibe Coding Competition (Team), Xerpihan & Yogyakarta at GIK UGM, 2025. Built an AI-powered legal tech platform helping UMKM navigate regulatory compliance — covering business legality, taxation, halal certification, BPOM, and PIRT documentation.
- Bootcamp DevWeb3Jogja Batch 5 (Nov–Dec 2025) — Smart contract security, blockchain backend, and Web3 risk mitigation. Built a tokenized peer-to-peer lending prototype as hackathon project.
- 1st Winner — Bridge Team Competition, Pekan Olahraga dan Seni Universitas Gadjah Mada (PORSENIGAMA) 2023. Demonstrated exceptional teamwork, strategic thinking, and sportsmanship in a university-level competitive bridge tournament — reflecting core values of integrity, collaboration, and fair play.
